ABOUT MYSELF

SURAJ DALVI
CODING ENTHUSIAST | FULL STACK WEB DEV
I'm a second-year student pursuing my B.Tech in Computer Science and Engineering (CSE) at **PCCOE** Pune Campus. I am always ready to have new experiences, meet new people and learn new things. Also, I like pushing myself and taking up new challenges.

EDUCATION

- **Pimpri Chinchwad College of Engineering, Pune** **CGPA: 8.85**
  B.Tech (Computer Science and Engineering) **(Dec 2021 - Jun 2025)**
- **MHT-CET 2021** **Score: 98.63%ile**
- **XII (HSC) |** Nav Maharashtra Junior College, Pimpri, Pune **91.17% | 2021**
- **X (SSC) |** Nav Maharashtra Vidyalaya, Pimpri, Pune **93.20% | 2019**

PROJECTS

- **Learning Resource & Development Centre (LRDC) : Education Platform | HTML, CSS** 🔗
  A platform where teachers can upload their study material and students can easily access this study material. Especially focus on the data. A fully front-end-based website with a little bit back-end and database. Based on HTML and CSS only.

- **Spotify Clone : Music Platform | HTML, CSS, Javascript** 🔗
  Developed a platform where everyone can listen to my favourite songs. Specially worked on User Interface (UI). A fully front-end-based website with no back-end and database. Complete use of HTML, CSS and Javascript.

- **Contact Form : Get In Touch | HTML, CSS, Javascript** 🔗
  A contact page for the customers to contact the organization. Focus on each and every part of the web page. Especially focus on the SMTP Server. Based on HTML, CSS and Javascript.

- **Todo List : Personal Use | React** 🔗
  A Platform where anyone can manage their task easily.
  It is React based website which makes it a SPA.

- **Todo List : Personal Use | Angular** 🔗
  A Platform where anyone can manage their task very easily and efficiently. It is also a Single Page Application (SPA) based on Angular.

- **Task Management System : TaskBit | MEAN Stack** 🔗
  MEAN STACK | MongoDB, Express, Node, Angular
  The Task Management System is a software application that helps users to manage their tasks efficiently. It is a platform that allows users to organize and prioritize tasks, set deadlines, assign tasks to team members, and track progress.
  It is one 'CRUD' Software that allows us to add, update, delete, and search the tasks of users.

TECHNICAL SKILLS

• **Languages:**
C/C++(Proficient), Java

• **Frontend:**
